- [Resetting your Enrolment App After Testing](#)

App Overview

The A+ Enrolment App is designed to work offline, in the event of internet connectivity/server issues on Results Day/Enrolment Day

It works with Microsoft Windows Operating System only

Don't forget to ensure your laptop is plugged in/fully charged to avoid any service interruptions!

Plan A for the day is to use your A+ system (online) as normal

Plan B is to switch over to the App (offline) and pick up where you left off

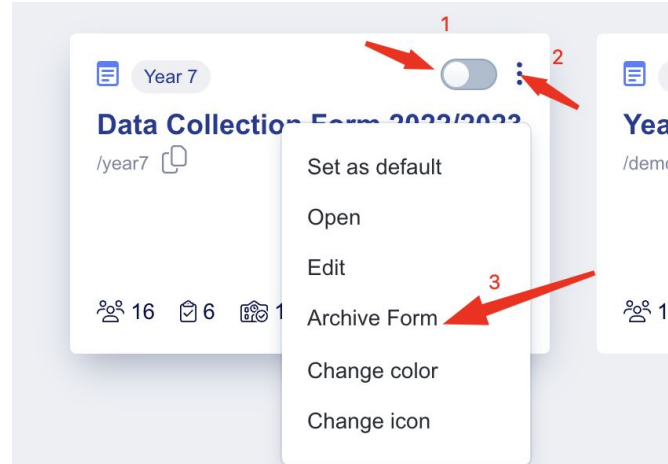

Every member of staff who will be involved in enrolling students needs to have the App installed on their own computer

The App will sync across all users, to reflect accurate class numbers and statuses of students every 1 - 2 minutes.

App Overview

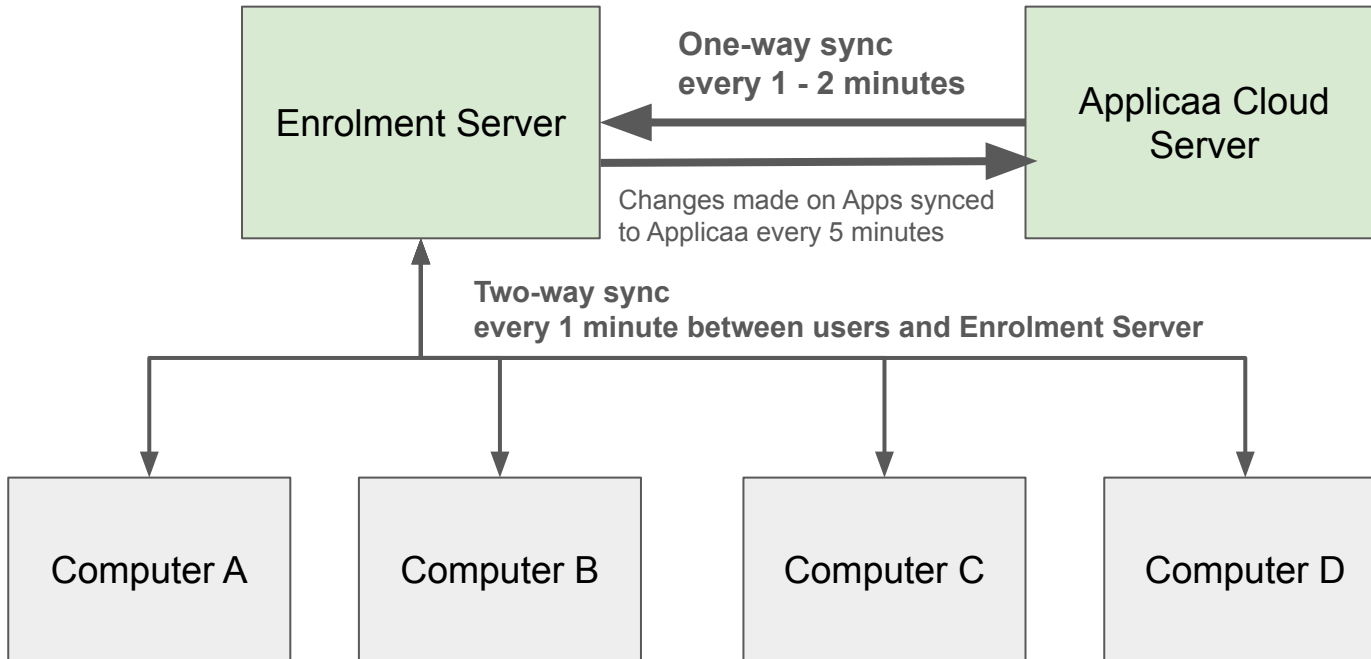

Before downloading the Applicaa Enrolment App, we recommend taking a moment to review any old application forms you have on Applicaa that you no longer need to access regularly. If you have any, archive them to move them out of the main form area.

This will save you time later when saving data to your enrolment app, as it collects data from all forms in the main form area. [Click here for instructions](#), please note that archiving **does not** delete the information. You can easily access these form in the archived forms area.

How the Enrolment App syncs data

The Applica enrolment app receives updates from Applica every 1-2 minutes. This ensures it stays current with student enrolment data, including grades, subject choices, and other core details. It also includes newly created applications on Applica. Therefore, if you switch to the app, it will have the latest enrolments and class sizes, allowing you to pick up where you left off.

Data across staff devices using the enrolment app syncs every minute, allowing you to see recent enrolments and other changes made by other staff.

Downloading and Installing the App

You may need to ask your Network Manager to install the App for you, depending on your school's network settings and permissions:

Remember - all enrollers will need to have the App installed

- Click [this link](#) to download the App
- Follow the directions to “accept and install” and then “finish” - by default, the App will launch once installation is complete
- Input your credentials, and click to “connect and download” (the same credentials you use to log into Appicaa online)
- Select the form you wish to sync, and click to “confirm”

Downloading and Installing the App

You may need to have the following domains whitelisted if you have a strict firewall system

***.applicaa.com**

***.applicaa-enrolment.com**

admissionsuk.s3.eu-west-2.amazonaws.com

If you are using a Proxy Server, firewall or any software that can blacklist/whitelist execution files.

Please ask your IT Department to update your environment to ensure the ***Applicaa Enrolment App.exe*** is able to connect to the Applicaa servers above and have enough permissions to read/write to its own installation folder.

Downloading and Installing the App

You can install the Applicaa Enrolment App using the command line by running the following script:

```
cmd/PowerShell/bash
```

```
"Applicaa Enrolment App Installer Ver. 1.0.0.0.exe" /exenoui /qn APPDIR="D:\Test"
```

Explanation:

- "Applicaa Enrolment App Installer Ver. 1.0.0.0.exe" — This is the name of the installer file.
- /exenoui — Runs the installer with no user interface.
- /qn — Performs a completely silent installation.
- APPDIR="D:\Test" — Specifies the destination folder where the application will be installed. You can change "D:\Test" to your preferred directory.

Note: Make sure the installer file is located in the directory where you're running this command, or provide the full path to the installer.

- You can replace "Applicaa Enrolment App" with "Admissions+ SIMS App" — the same command-line approach applies to both.
- You can use an .msi installer as well if available; the .exe is used here just as an example.

Functions of the App

On loading the App, you will be shown the list of all applicants, with key data like their application, offer and enrolment statuses; flags and colour-coding as determined by your specific requirements.

You can switch tabs along the top, to see students in each of the enrolment statuses.

The screenshot displays the 'Appicaa Enrolment App' interface. At the top, there's a header with the app name, a user profile 'Ben William', and system icons. Below the header is a tabbed interface for filtering students by enrolment status. The tabs are: 'All' (98), 'Pending' (40), 'Details To Be Checked' (17), 'Ready To Enrol' (5), 'Enrolled' (31), 'Enrolment Waiting List' (4), and 'Enrolment Declined' (1). The 'Details To Be Checked' tab is currently selected. Below the tabs is a search bar labeled 'Search students'. The main area contains a table of student records. The table has columns: Photo, Full Name, Birthday, Gender, A+ Groups, Email, App Status, Enrolment Status, Offer Status, Internal, Total Score, Average Score, Flag, Colour, Updated at, Updated By, and View Profile. The 'App Status', 'Enrolment Status', and 'Offer Status' columns are highlighted with a yellow box. The 'Flag' and 'Colour' columns are also highlighted with a yellow box. The table lists four students: Maru Mee, Ooo Ddd, Fish Ng, and Test04 Test04.

Photo	Full Name	Birthday	Gender	A+ Groups	Email	App Status	Enrolment Status	Offer Status	Internal	Total Score	Average Score	Flag	Colour	Updated at	Updated By	View Profile
	Maru Mee	06-10-2006	♂		happy +test@appicaa.c...	Completed	Details To Be Checked	Pending		40	8	🚩	🟢	19-08-2024 21:18:36	Appicaa Cloud	A+

Total: 5

3. Uploaded Documents

- Application form
- Copy of exam results
- Documentation for Additional Support

3. Add a new grade

If you add or update grades for a student, their TPS and APS will be recalculated automatically.

If a student arrives on the day and they are a new applicant, you can add them via your Enrolment App by clicking the “add new student” button and inputting their details.

Confirming their Courses

Click the Course Selection tab and you will see a summary of their grades, and a list of their applied, offered and enrolment form courses alongside the confirmation box.

Just like in your A+ system, click the + icon to confirm the student into classes for which they qualify, and use the Waiting List Management function to add them to the waiting list for any subjects they do not qualify for (in the event that you are considering allowing them onto that course and wish to bypass the requirements).

Waiting List Management

Click “Waiting List Management” to add a course which the student does not qualify for, or was not one of their original choices. Select “click to unlock” in order to see the full list of subjects, select the one(s) you wish to add and the arrow to confirm.

Enrolling into Classes

Once all of the classes you wish to enrol the student into are listed in the “confirm courses” box, scroll to view the available blocks for each subject.

You can manually assign the student to their blocks, or click to **auto-allocate** and the system will assign them to the best fit, in order to balance group sizes.

Click to **‘Enrol’** to confirm and save the selection and complete the enrolment process for that student.

Testing the enrolment app with your enrolment clone

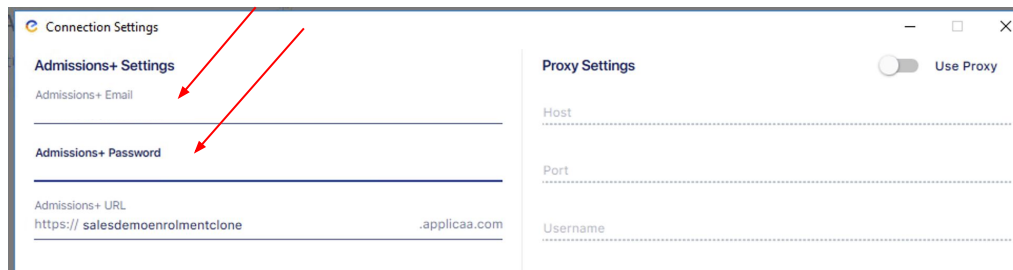

To familiarise yourself with the enrolment application, we recommend performing some test enrolments.

Since you do not want this information to be saved, we suggest connecting the enrolment app to your Appicaa **enrolment test system** during testing.

[Click here to learn](#) how to generate your enrolment test system if you haven't already, and how to find its domain/URL. You can also [click here](#) to find reasons why schools use their enrolment test system.

The format will be your normal school domain followed by 'enrolmentclone.appicaa.com'. For example, if your domain is <https://salesdemo.appicaa.com>, the enrolment clone would be <https://salesdemoenrolmentclone.appicaa.com>.

When connecting to the enrolment app (see image), you can use the same email and password that you normally use to connect to Appicaa online.

Syncing Data back to Appicaa A+

Data will automatically sync across all installed copies of the app. For example, if a colleague enrolls a student into a class, the number of available spaces in that class will update in real-time on your app as well.

Enrolments made by individual staff members in the Enrolment App will **automatically sync back to Appicaa within a few minutes.**

Staff members will not need to manually trigger the upload of their changes. You can track whether all changes have been saved into your online system by navigating to **Settings > Enrolment Settings**, then scrolling down to **'Sync Data from the Enrolment Server'**

Enrolment Settings

Sync Data from the Enrolment Server

All changes have been synced, everything is up to date.

Turn this setting on to automatically save changes made by staff on the Appicaa Enrolment App back to your Appicaa Admissions+ Platform: ☒

Once the data has been uploaded back to your A+ system, you can proceed as usual with exporting enrolled classes to your MIS from within your A+ system.

Resetting your enrolment app after testing

Once you have completed testing the enrolment app, you will need to reset the data. If you are connected to the test version of the Applicaa system, switch to your live system in preparation for enrolment day.

To reset your Applicaa enrolment app, follow these steps:

1. Click on the profile icon at the top right, then click on 'About Applicaa Enrolment App'.
2. In the pop-up window, click 'CLICK HERE TO RESET YOUR LOCAL DATA'.

This will display a confirmation pop-up, and then prompt you to enter a new Applicaa URL to reconnect. **Each staff** member will need to do this on their computer.

Mylor Community Primary School

What's Next

We recommend you now take time to ensure you have installed the application for the staff that will be involved with enrolment day and train them on how to use the enrolment app in the unlikely event they need to switch to it as a backup.

On Wednesday 20 August, you will receive the achieved grades for your internal students and should import these into A+.

That data can then be synced to your App - this will happen automatically.

Embargo settings will apply - anyone who is embargoed from seeing the results data in A+ will also be embargoed from seeing it in their version of the App.

The background features a collection of geometric shapes. A large, light blue hexagon is centered. To its top-left is a medium grey hexagon. To its top-right is an orange parallelogram. To its bottom-left is a dark blue hexagon. To its bottom-right is a small light blue hexagon. Below the large hexagon is another small light blue hexagon. The text "Do you have any questions?" is centered over the large hexagon in a bold, dark blue font.

Do you have any questions?
