# The Timeline

Autumn:

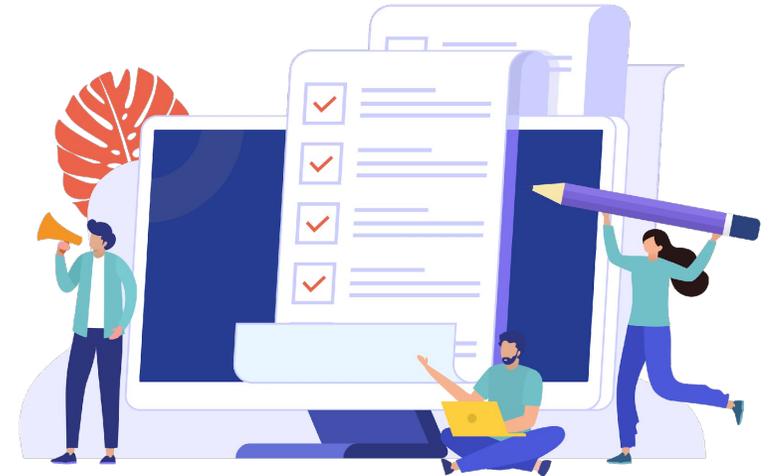

- ❖ Parents apply via Local Authority

Spring:

- ❖ Prepare your Admissions+ form
- ❖ Receive your list from the Local Authority
- ❖ Import your list straight into Admissions+
- ❖ Send welcome emails to parents
- ❖ Parents complete your form
- ❖ Import your data into your MIS

Summer:

- ❖ Allocate students to registration/form groups using the Sorting Hat
- ❖ Organise Transition Days using Events feature

# How to see your new form

Click on the blue wording in the upper left of your dashboard and then click “forms area/multiple forms”.

Multiple Form

Your tiles area will appear and will look something like this:

Your new form will already have been created for you (cloned from your previous cycle) and you will see it in this area.

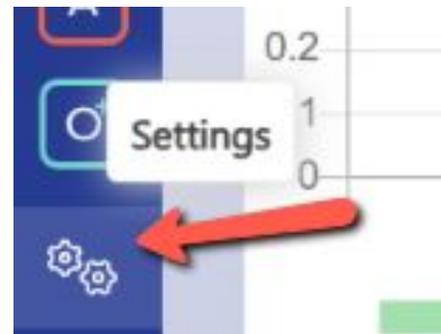

Turn the toggle switch on to make it active - it needs to be active to enable importing/exporting with your MIS.

# How to close your old form

Now that the previous cycle has finished, you don't want parents completing anything on that form, as that data is now in your MIS and managed there.

In your old form:  
Navigate to **settings > application form >** and click to disable the phase.

Navigate to “**parent homepage**” to edit those messages, update your settings and change any images as needed - this is what parents will see once they have logged in.

The general welcome message is seen by parents across **all intakes**, but there is also a place for you to add a separate, Reception-specific welcome message if desired.

You could consider changing your configuration to suit your intake:

# Checking your email templates

The email templates area is really useful and can automate a lot of your processes!

There are several automated emails you will need to check - you can preview and edit them by scrolling right on the table.

# Importing your Local Authority file

There is a guide to importing parents into Admissions+ on our Knowledge Base and you will find it [here](#).

On the **imports** area of your platform, you will see a sample CSV file which you can download and populate with your LA data.

You will then be able to import your data and this will create a system-generated password for each parent, which you will send to them in the Parent Welcome email.

Parents of twins will have one login, and will have access to forms for both children.

The screenshot shows the 'Imports' section of the Admissions+ platform. The page title is 'Year 7 Data Collection Admissions F...' and it includes a 'Knowledge Base' link. The 'Data' menu is open, highlighting 'Imports'. A progress bar indicates the steps: 'Select Type of Data', 'Select the Import Method', and 'Source of Data'. Below the progress bar, there are links to 'Admissions+ Import Guides', including 'User guide for importing LA Offers for Year 7 Data Collection', 'General video guide - updating existing applications via CSV', and 'General video guide - Importing new applicants (e.g. external Sixth Form Applicants)'. A form asks for 'Give your import a name \*' and 'What would you like to update or import?'. Under the 'Users' section, there are two sample CSV files: 'import parent sample.csv' and 'import student sample.csv'. A red callout box points to the 'import parent sample.csv' file with the text 'Download this file and add your data to it'.

**Important: you MUST import your LA data straight into Admissions+. Please don't import the file into your MIS!**

All fields on the sample CSV can be useful to import, but the ones shown in bold are **mandatory**.

**Importing - step by step:**

1. Click Data > Import > Start an import
2. Name your import, select “users” and “next”
3. Select “new users” (you will be prompted to select this) and “next”
4. Select parents (again, you will be prompted) and “next”
5. Choose “CSV”, then “next”, and then upload your file and click “next”
6. Complete the mapping step and click “next” to review the data and commence the import

*\*Use this selection for importing LA Offers for Year 7 Data Collection or Reception Admissions.*

Each column header below should be mapped to a property in Admission+. Some of these may be already been mapped based on their names. Anything that hasn't been mapped yet can be manually mapped to a property with the drop down menu. If you decide to not import a property just leave it unmapped and it will be ignored.

Data from your CSV needs to be mapped to the correct field on the right

# Manually Adding Extra Parents and Children

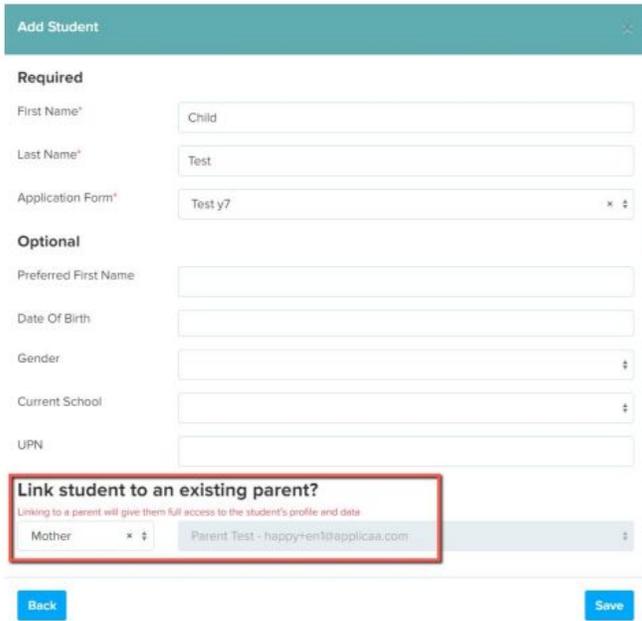

Often, extra students are offered places as the appeals process gets underway and offers are accepted/declined elsewhere.

You can either **manually add** extra parents and their children, or **import them via CSV** via the same method previously used.

The process for manually adding is covered step by step in the next slide.

The system will detect any users who already exist, so if you do opt to import new parents via CSV you can add their data to your existing file and re-import it - only the new parents will have accounts created and **no duplicates will be made.**

**Once you have added the parent, don't forget to add the child!**

### Manually adding, step by step:

1. Click “manage users” and select “manually add people”
2. Click “parent” and add their email address
3. Click “next” and add the parent’s first and last name, plus any optional fields if known
4. Click “save” and then “send welcome email”, followed by “done”
5. Search the name of the parent in the search bar at the top of your dashboard and click on them to load their profile
6. Click the “add student” button to add their child’ details and link them to the child
7. Click “save” and “done”

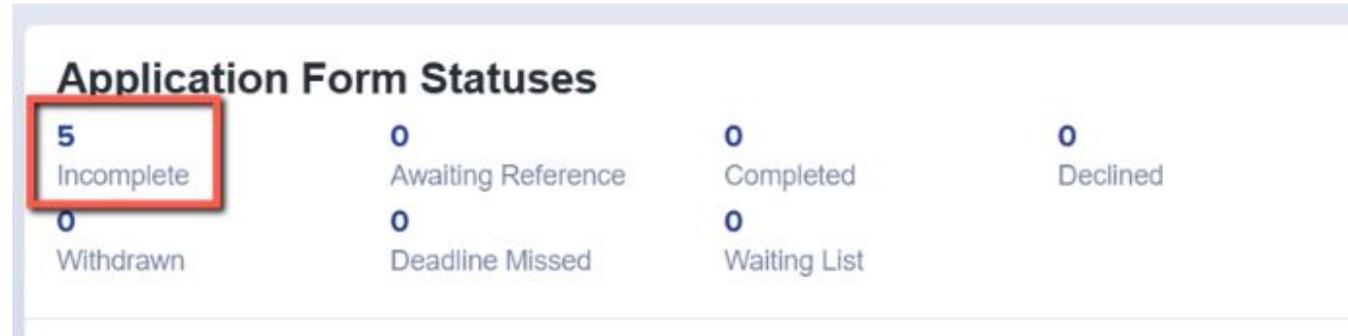

# Chasing Incompletes

You can chase incomplete forms by sending reminders to the parents - either manually, or by scheduling an automated chaser.

Click the “incomplete” status on your main dashboard.

Select them all using the checkbox and then click “communications” > “send email”.

You can then type a message and send to the parents of the selected children, or insert a premade manual template.

# Transition Features

These features are in the Post-Enrolment area of your platform, and though there are three features, the one most relevant for a Reception intake will be our **Sorting Hat** feature.

You'll find the comprehensive guide to our Transition Features [here](#).

[Join me for training & a demo of these features!](#)

# Sorting Hat

The sorting hat enables you to sort students into form groups and transfer those form group allocations to your MIS.

You can configure it to balance groups by a range of factors including gender, ethnicity, current school, SEN status and more.

You can also set parameters to pair certain students together, or set an “avoid” clause to keep particular students apart.

The feature calculates the best fit, based on the criteria you have set and you can manually move students to different groups or rerun the wizard as much as needed.

## Welcome to Sorting Hat

This wizard helps you assign new students to groups based on your chosen criteria. You can specify student pairs to keep together or separate and make overrides for special cases. The system will then balance the remaining groups as best as possible to meet your criteria.

# Update Staff Users

Check your list of staff users, particularly if you have had a change in personnel.

Ensure any staff who no longer work there are removed, and that new colleagues are added.

Set your Key Contacts - anyone set as a Key Contact will receive information from us such as important system updates, invitations to events etc (we send these by email).

The background features a central light blue hexagon. To its top-left is a grey hexagon, and to its top-right is an orange parallelogram. Below the central hexagon are three smaller hexagons: a dark blue one on the left, a light blue one on the right, and a very small light blue one at the bottom center.
